Aldon Box Car Door Opener Worksheet

Aldor 4020-02 Extendible Aldor 4020-14 Fixed Easy Slide 4020-13

Please fill out both sections of this worksheet so we can make a recommendation of what to use.

1 Your Dock Which drawing (1A, 1B or 1C) best illustrates your dock? Supply the dimensions requested.

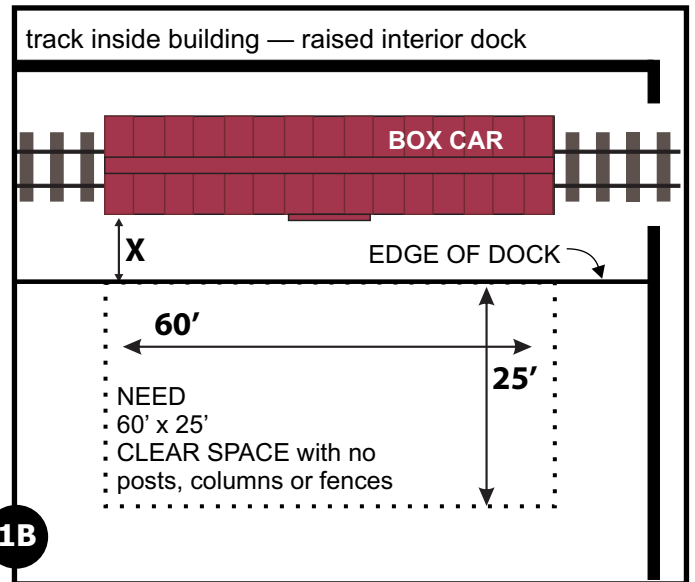

1A

X = _____ Side of car to edge of dock.

Y = _____ Depth of dock (12 ft. min.)

Z = _____ Width of dock (60 ft. min.)

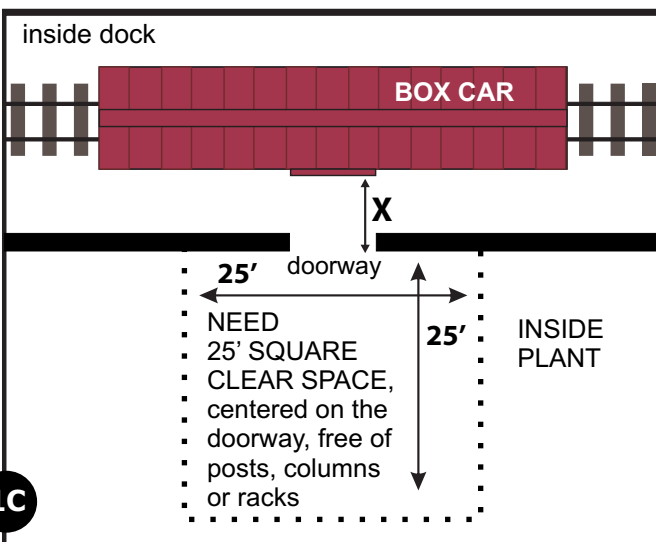

For this type of dock situation, if you do not have at least 12' of depth (Y) and at least 60' of width (Z), we have no door opener that can be safely used.

1B

X = _____ Side of car to edge of dock.

If you do not have 60' x 25' of clear space free of edge of dock encumbrances (columns, bollards, fences, etc.) we do not have a door opener that can be effectively used.

1C

X = _____

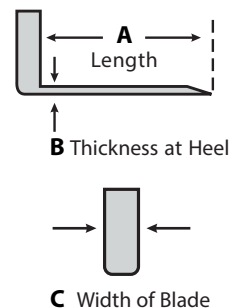

Side of car to **INSIDE** of building wall.

2 Your Forklift

Supply the dimensions requested below

Twin blade forklift
6,000# maximum capacity
We limit forklift capacity to 6,000# in order to avoid over-forcing the box car door

A Length _____
B Thickness _____
C Width _____
