Measure your Switch Stand style(s).

Most switch stand masts are either round or square. Indicate in the appropriate box the dimensions of your mast, hole locations, and height of mast above the gear case.

If you have a mast shape other than round or square, sketch the shape in the empty box and provide all dimensions.

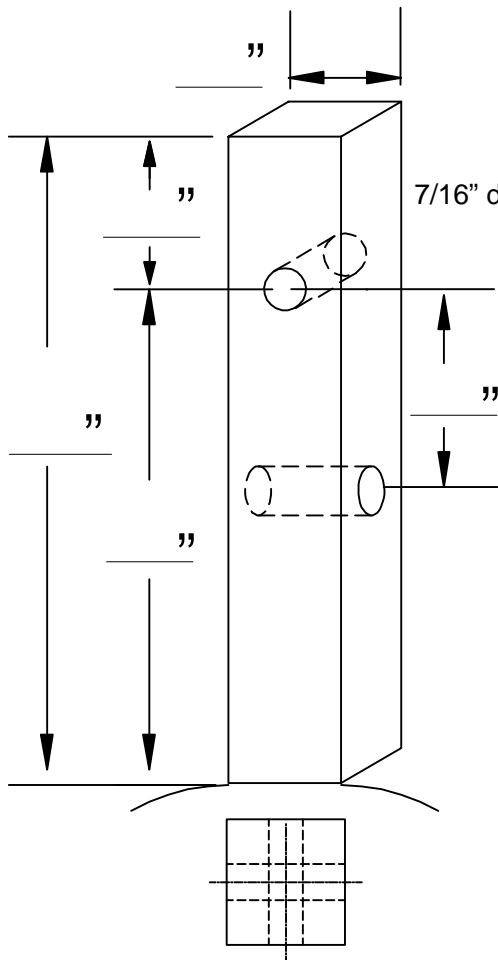

Use more sheets as necessary to identify additional mast styles or sizes.

Fax form back to

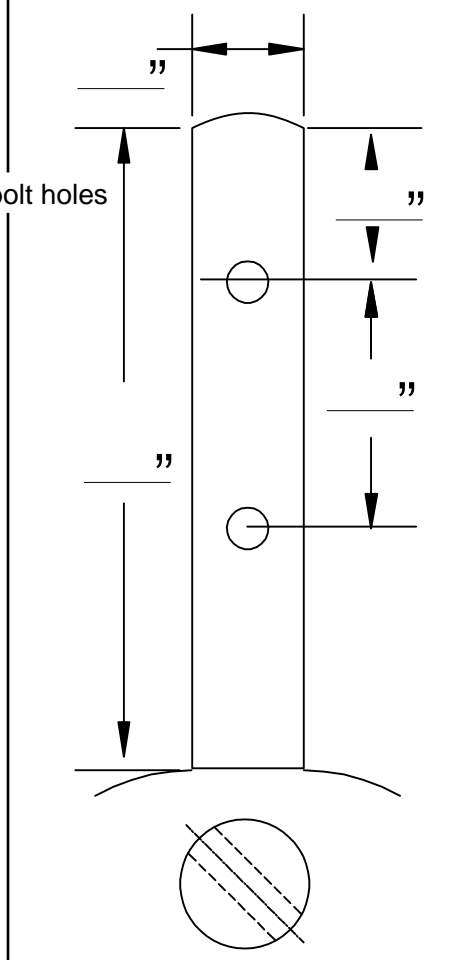

Aldon Company: 847.623.6139

or scan and email to e-rail@aldonco.com
